

ULTI

OPTI LIGHT

Take a breath of life

UVC INTELLIGENT AIR PURIFIER

E.CO2 Pro

UVC INTELLIGENT AIR PURIFIER

UV LED Sterilization

15 Million Negative Ions

PM2.5 Real-time monitoring

240 Minutes Battery Life

Safe UVC ultraviolet disinfection, with tens of millions of negative ions produced per second. Removing dust and odors.

Industrial-grade high-capacity batteries provide an extended standby time.

15 Million Anions

PM2.5 Real-time Monitoring

Dust / Smoke Elimination

Multiple Usage Scenarios

Strong / Gentle Wind Mode

10m Recycle Purification

Eco-friendly UVC LED

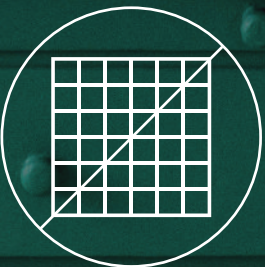

High-efficient Sterilization

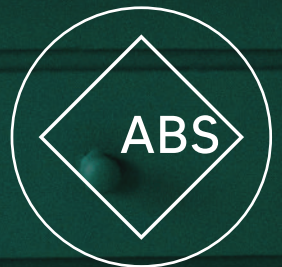

1800mAh lithium Battery

4 Colors Breathing Light

No filter Needed

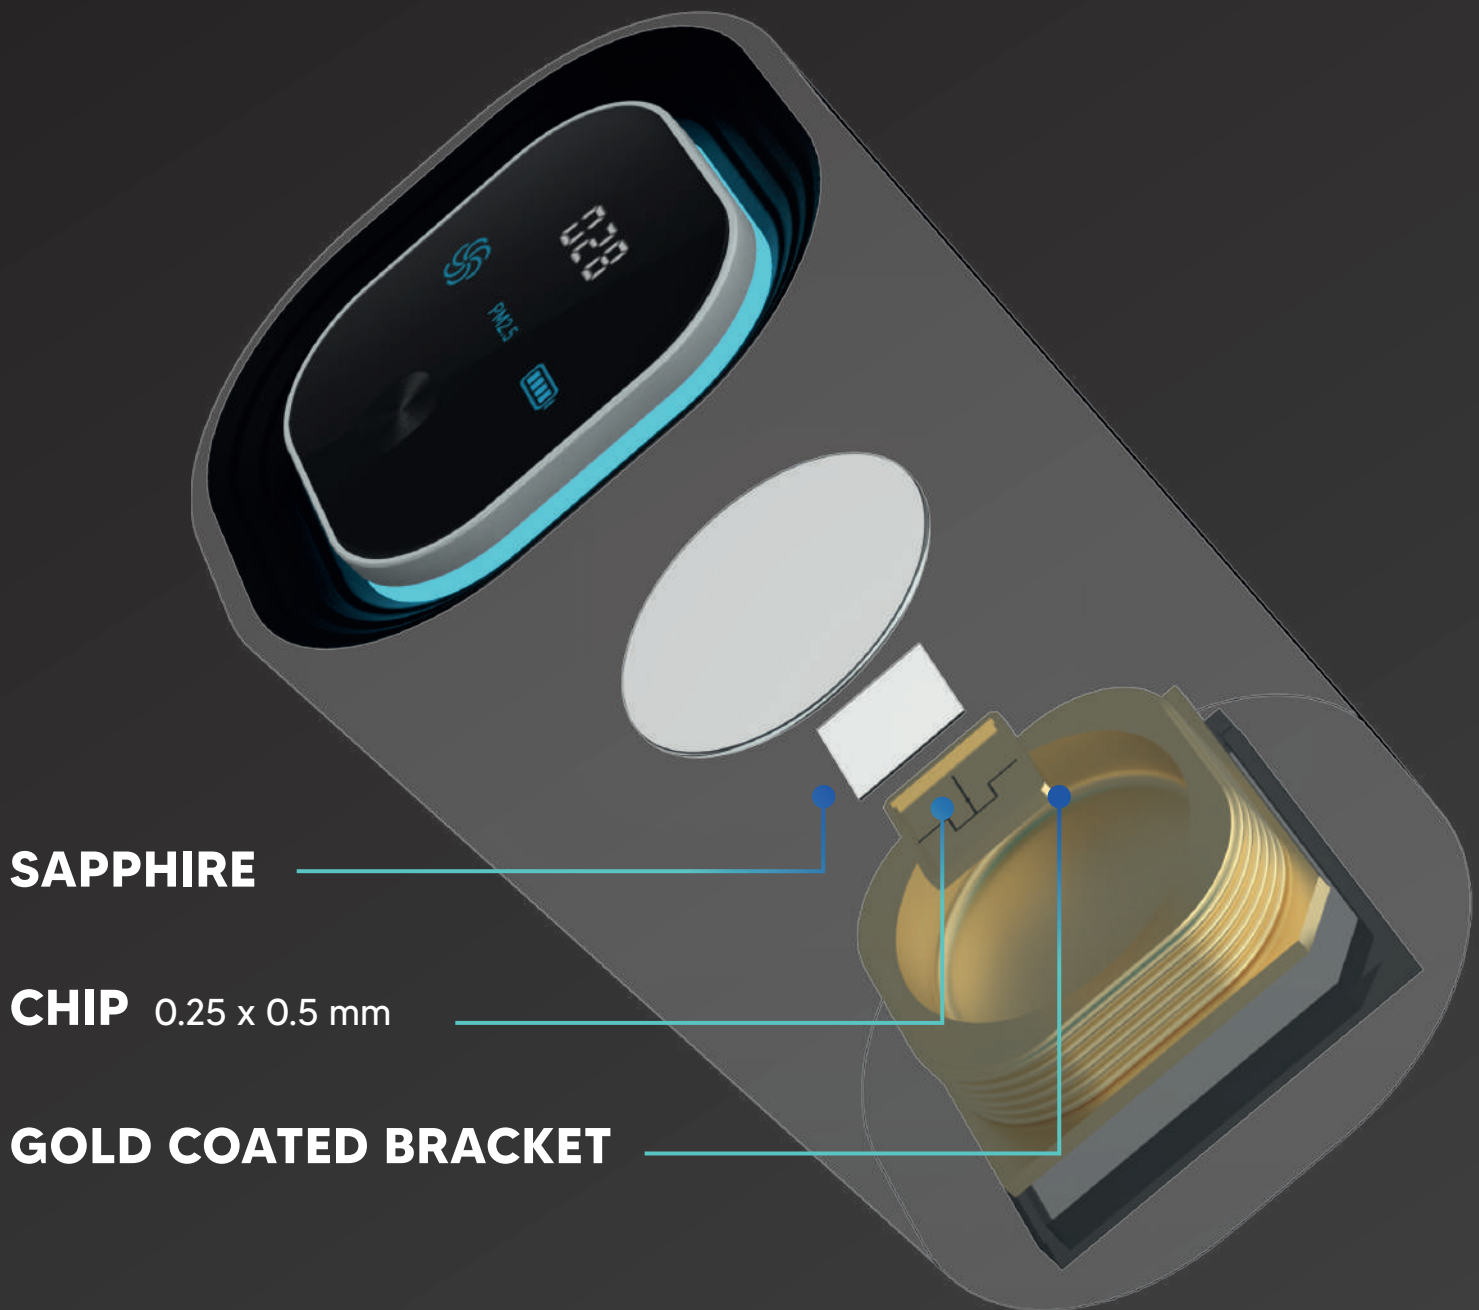

ABS + Rubber oil Excellent Tactility

UVC LED

Mercury-free and Ozone-free

Deep UV disinfection LED lamp beads technology breakthrough, up to 99.9% sterilization rate.

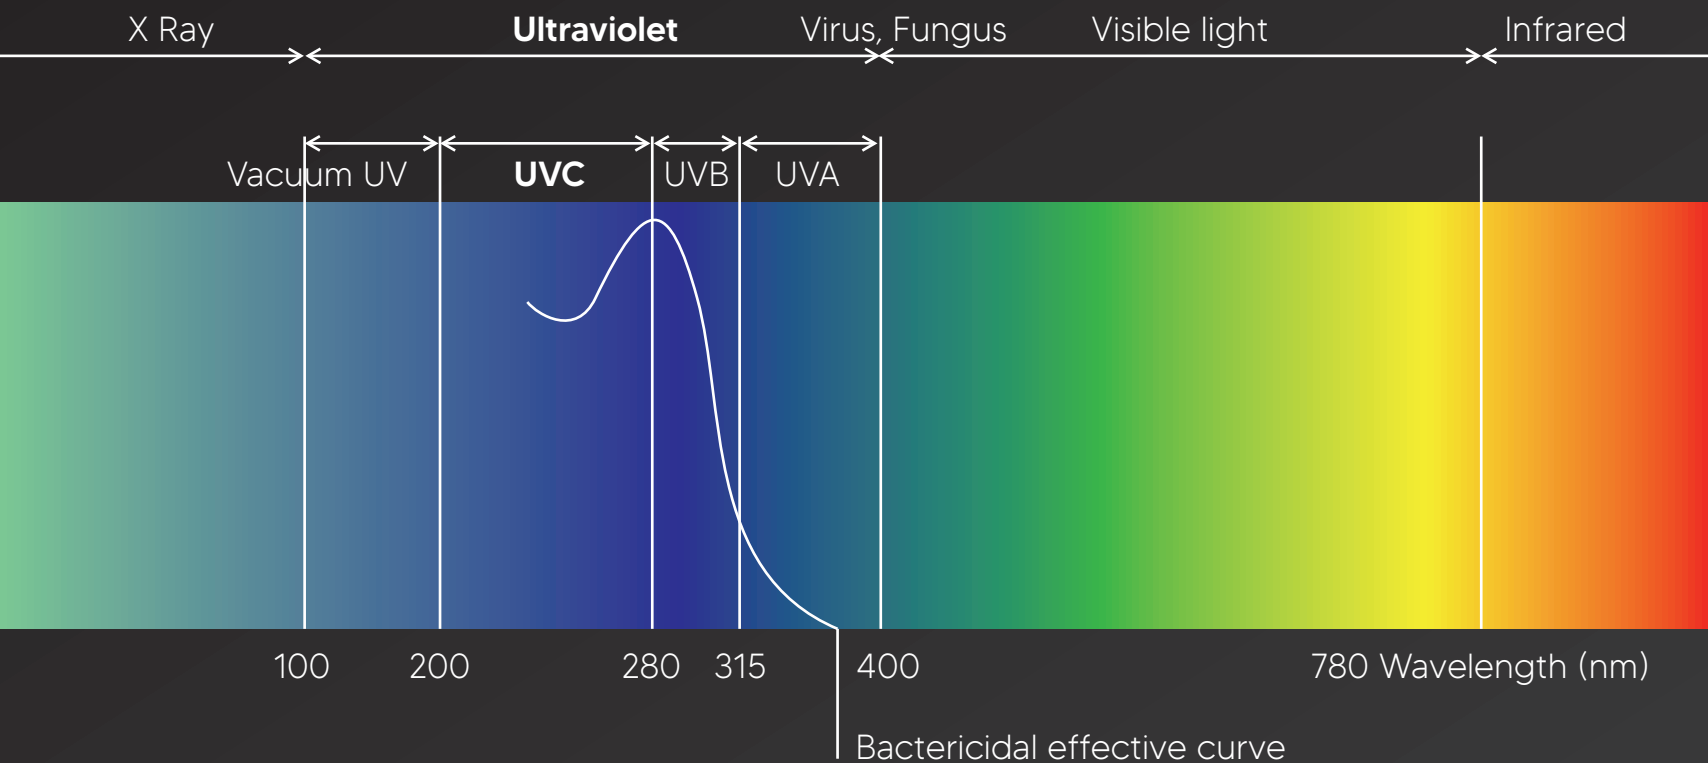

LIFE SPAN OF LED: 10000H

* Test report by Guang dong Microbiological analysis and testing center: 2015FM0109D

UVC

ULTRAVIOLET DISINFECTION

Efficient disinfection of bacteria and viruses to protect your health.

THE PRINCIPLE OF UVC ANTIVIRUS

260 - 280nm UV Wavelength

It is easy to damage the DNA and RNA of the organism and cause the death of bacteria and viruses, reaching a sterilization rate of 99.9%.

ANION STERILIZATION AND PURIFICATION

The air purifier can release high-density negative ions per second, which quickly kill all kinds of bacteria and germ in order to make your car or/and your home full with natural oxygen. The unstable negative ions actively attract the polluted micro articles in the air, which are always positively charged, thus to make the invisible PM2.5 form into a cluster and fall. The negative ions also can damage the bacterial protein to make it weak or dead, to achieve air purification and sterilization. In addition, it is necessary to replace filters.

NEGATIVE IONS

NEGATIVE IONS

PM2.5

NEGATIVE IONS

Dust / Smoke Elimination

PAY ATTENTION TO CAR INTERIOR POLLUTION

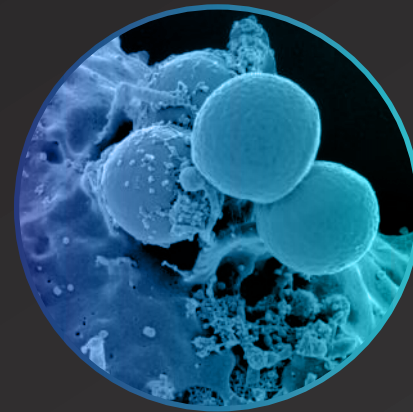

Dust / Smoke Elimination

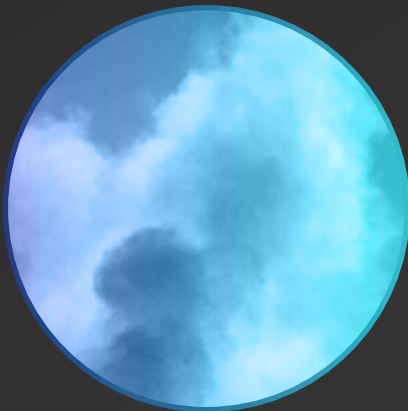

Formaldehyde Benzene

Harmful substances such as Formaldehyde and Benzene generated in interiors such as Cushion leather covers of cars.

Bacteria

Microbes such as Bacteria and Viruses attached to the steering wheel and buttons.

PM 2.5

Dust Mites and dust particles in the air outlet of the air conditioner.

Odor

Amine smoke, gasoline smell, second-hand smoke and other residues generated by the engine.

99.9% STERILIZATION AND DUST REMOVAL

15 Million negative Ions

No filter needed, lifetime use.

Need to install
car holder

UVC INTELLIGENT AIR PURIFIER

E.CO2 Pro

TECHNICAL SPECIFICATION

E.CO2 PRO

INPUT : 5V = 1A

INPUT INTERFACE : TYPE -C

LED POWER : 4MW

LED LIFE : 10000H

UV WAVELENGTH : 260~280NM

NEGATIVE ION : 15X10 PCS/ CM

CELL CAPACITY : 1800 MAH

DISCHARGE TIME : 240 MIN

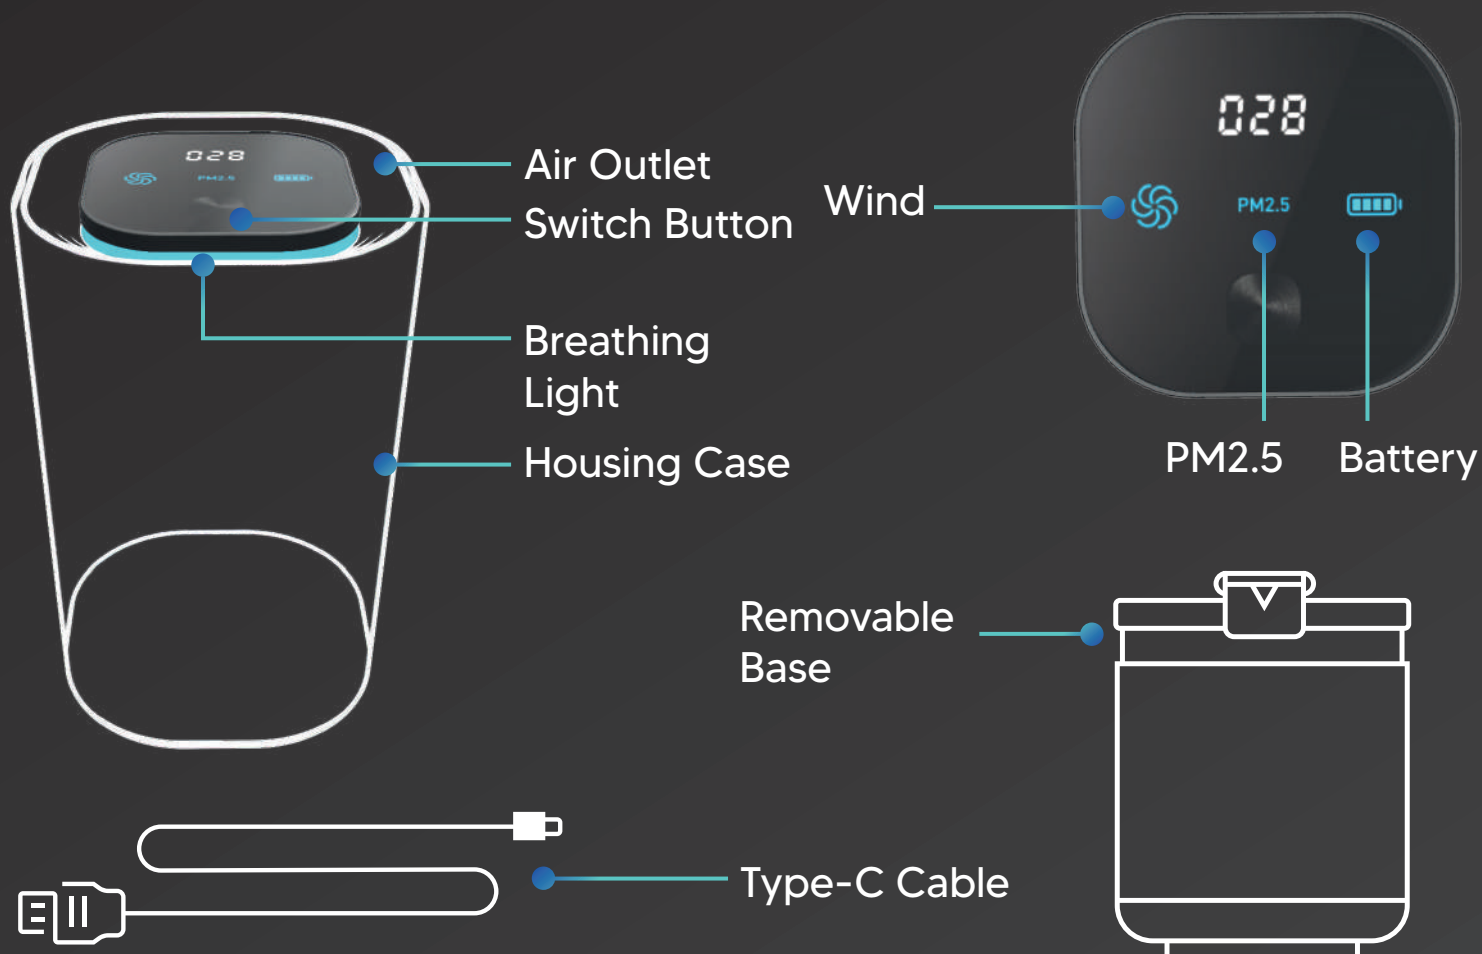

SIZE : 80*80*126MM

MATERIAL : ABS + RUBBER OIL

NOISE : <50DB

WEIGHT : 452G (137G
HOLDER INCLUDED)

PACKAGE INCLUDED: AIR PURIFIER, TYPE-C CABLE, USER MANUAL, WARRANTY CARD.

PM 2.5 REAL-TIME MONITORING

You will notice that the air you breath is way cleaner.

Gentle

Strong

Low Battery

Charging

Fully Charged

Dust particle sensor

Responsive, accurate numbers

OPTILIGHT®

Optilight Technology

Reduces wind noise by 30%,
A doubled life span. That makes it
perfect for interior use.
